Project work - Mandatory Presentation
Advanced Python - Spring 2023

Project presentation

To be presented in class: June 1

Important: All projects must be presented during the lecture

Use **screenshots** in your presentation. Do **not** attempt to run your project live.

Prepare a short presentation of your semester projects. The presentation should be no more than **five** minutes long, and briefly cover:

- Goal of the project

- Example of running your project

- How your program handles unexpected user input

- Example of a unit test in your project

- An issue that was created on your repository and how you solved it
